

S/S LIGHT WEIGHT MARINE FUEL FILTERS

TYPE RFF 350 & RFF 175

The RIMS Marine Fuel Filters are light weight compact units designed specifically for High Speed Craft using Marine Distillate.

The units are fabricated from 316 Stainless Steel providing excellent corrosive resistance and reliability.

Available in both Simplex and Duplex configuration the filters can be supplied with DIN or SAE Flanges to match required style and size.

The use of a full flow 3 Way Ball Valve enables isolation of either filter to facilitate in service change over.

The Filters Utilize the Vokes "Microfelt" element which is available world wide through the Vokes distribution network.

The Design has current DNV Type Approval and meets the requirements of all major survey authorities.

DESIGN SPECIFICATION

RFF350: 350 litres per minute

RFF350 Mass: Simplex 62Kg

Duplex 135Kg

RFF175: 175 litres per minute

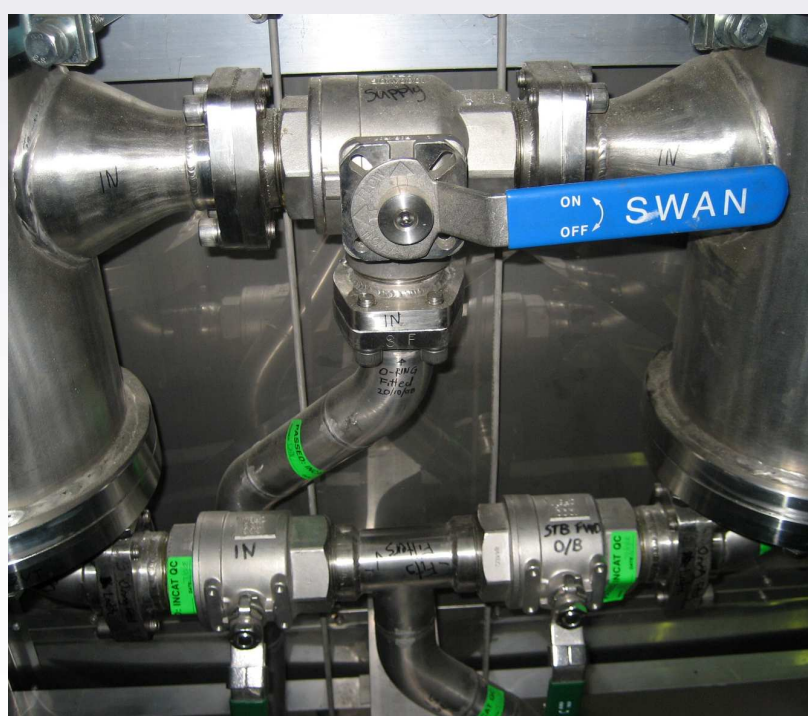

RFF175 Mass: Simplex 48Kg

Duplex 108Kg

Working Pressure: 10 bar

Test Pressure: 15 Bar

Temp. Operating Range: 0 to 90 Deg C
